

Lab Esercise – 8

Q1) This project demonstrates navigation between **four screens (activities)** using **explicit intents** and passing data between them.

Screens Overview

1. **MainActivity (Screen 1)** – Home screen with navigation buttons
2. **SecondActivity (Screen 2)** – Receives and displays data
3. **ThirdActivity (Screen 3)** – Sends modified data
4. **FourthActivity (Screen 4)** – Final screen displaying summary

1. MainActivity (Screen 1)

- Contains:
 - EditText (User input)
 - Button (Go to Screen 2)

2. SecondActivity (Screen 2)

- Receives data from MainActivity
- Displays it
- Button to go to Screen 3

3. ThirdActivity (Screen 3)

- Modifies received data
- Sends to Screen 4

4. FourthActivity (Screen 4)

- Displays final message

Q2) Make an app to control audio playing through seekbar and also give provision to control the volume of the audio.

Q3) Make a simple application to Log countdown timer.

Q4) Make an application where an image of a rocket is bearing a countdown timer. The countdown can be adjusted using a seekbar. Once the countdown is set, the countdown starts. When the countdown finishes, a siren honks.
